SAP® Qualified Partner-Packaged Solution

In today's rapidly evolving business landscape, upgrading to SAP S/4HANA Cloud is no longer an option but a necessity. Organisations that choose to delay or forgo this crucial upgrade may face a multitude of challenges that impede their growth and competitiveness. Businesses are at risk of being left behind with outdated technology that limits their ability to harness the full potential of their SAP systems.

MOVE TO SAP S/4 HANA CLOUD WITH

Our SAP-qualified packaged solutions for the OGE industry combine key modules of SAP S/4HANA Cloud Public Edition with features and functions tailored to the specific needs of operating companies in the energy sector. These pre-configured, templated solutions are based on standard SAP processes and include our own deployment accelerators for speed and ease of implementation.
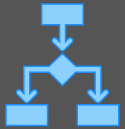

S/4Energy Core

S/4Energy Pro

Our innovative approach has been recognised through the SAP Customer Success Award and BTP Innovation Award, which demonstrate our ability to harness the power of the latest SAP products and cloud technologies to help our clients become intelligent, sustainable enterprises. Key Benefits

STREAMLINES CORE BUSINESS OPERATIONS
Our solution simplifies finance and procurement, breaking down barriers and providing clearer insights into operations.

FASTER ROI
Ability to deliver faster ROI by being more efficient and effective, allowing you to see quick returns in a shorter timeframe.

SAVES TIME AND MONEY
Businesses can significantly reduce the time and cost associated with deploying and maintaining a traditional ERP system.

DEPLOYED IN MINIMUM TIME
Seamlessly expand your operations and accommodate increasing demands without compromising performance or efficiency.

The S/4ENERGY Package

Name: Core
Duration: 12 - 14 Weeks
Pricing: £150,000 (implementation)

Package Leading Software Components:
SAP S/4HANA Public Cloud Edition (Finance, Procurement)

This package is aimed at businesses in the Energy sector who require just a core Finance and Procurement function, typically for independent start-ups (in renewables for example) or an existing non-op business unit / company where asset management is not required at the time of deployment. The focus of the package is just a rapid deployment that can be delivered in 10 weeks.

Name: Pro
Duration: 16 - 20 Weeks
Pricing: £450,000 (implementation)

Package Leading Software Components:
SAP S/4HANA Public Cloud Edition (Finance, Projects, Procurement, Logistics, Plant Maintenance + HR time-writing) + Smart Ex+ Asset reporting suite

This package is aimed at businesses in the Energy sector who require a baseline ERP Solution to manage the core back-office functions of finance, procurement, and time capture. Typically, in the energy sector, such companies would also require the ability to operate and manage high numbers of equipment and assets and therefore the baseline solution + AG industry cloud solutions for inspections (Smart Ex) and Asset reporting suite.

> *AG's customer service is top-notch, always transparent, and available to answer our questions and provide support whenever we need it.*
> **IT Director for a large Oil & Gas Operator**
